

Everyclick – a charity search engine

Everyclick is an internet search engine with a difference – it donates **half** its revenues to charity.

Most people use search engines to find things on the internet, but did you know that every click of your mouse can generate income for WDCS?

Everyclick works just like any other search engine, providing full search results, images, news feeds and special features such as Amazon product listing - why not try using it instead of Google?

WDCS is listed on the Everyclick website and can benefit from your support every time you search the web.

Just visit www.everyclick.com/wdcs and start searching!

Every time you search with Everyclick, whales and dolphins will benefit, so please use Everyclick as your favorite search engine to support WDCS.
